

SILVIO

Some people think its tough to put up with the pain of cycling.

The pain of burning legs, bursting lungs and the hard swallow of dry air down the throat? Yes! The thrill of leading out again? Oh, absolutely! But living with a sore or numb crotch? That's for dummies. Risking erectile dysfunction or genital numbness? You gotta be kidding. Living with lower back complications, wrist pain and L4 L5 spinal issues? Forget it, that's just plain unnecessary. Leave all that to the 20 somethings with UCI visions of grandeur who don't know better. Don't be a cretin, let Cruzbike Silvio secure your riding future as long as you decide. Get out there and really truly enjoy the thrill of the ride as you know you can.

world's fastest unfaired road bike

Silvio runs adjustable air suspension up front with titanium rear leaf each with carbon fiber chainstays for maximum rollout and positive tire contact with the road. The frame is T6 7005, designed in Australia and built by a Cruzbike Inc. in Taiwan to exacting specifications.

1. ERGONOMICS
 Recognise the road biker's physical fitness and muscle development from regular and intense road training.

2. FRAME SOLUTION
 Invent and patent a frame design specifically to support the body and fully capture the rider's energy output.

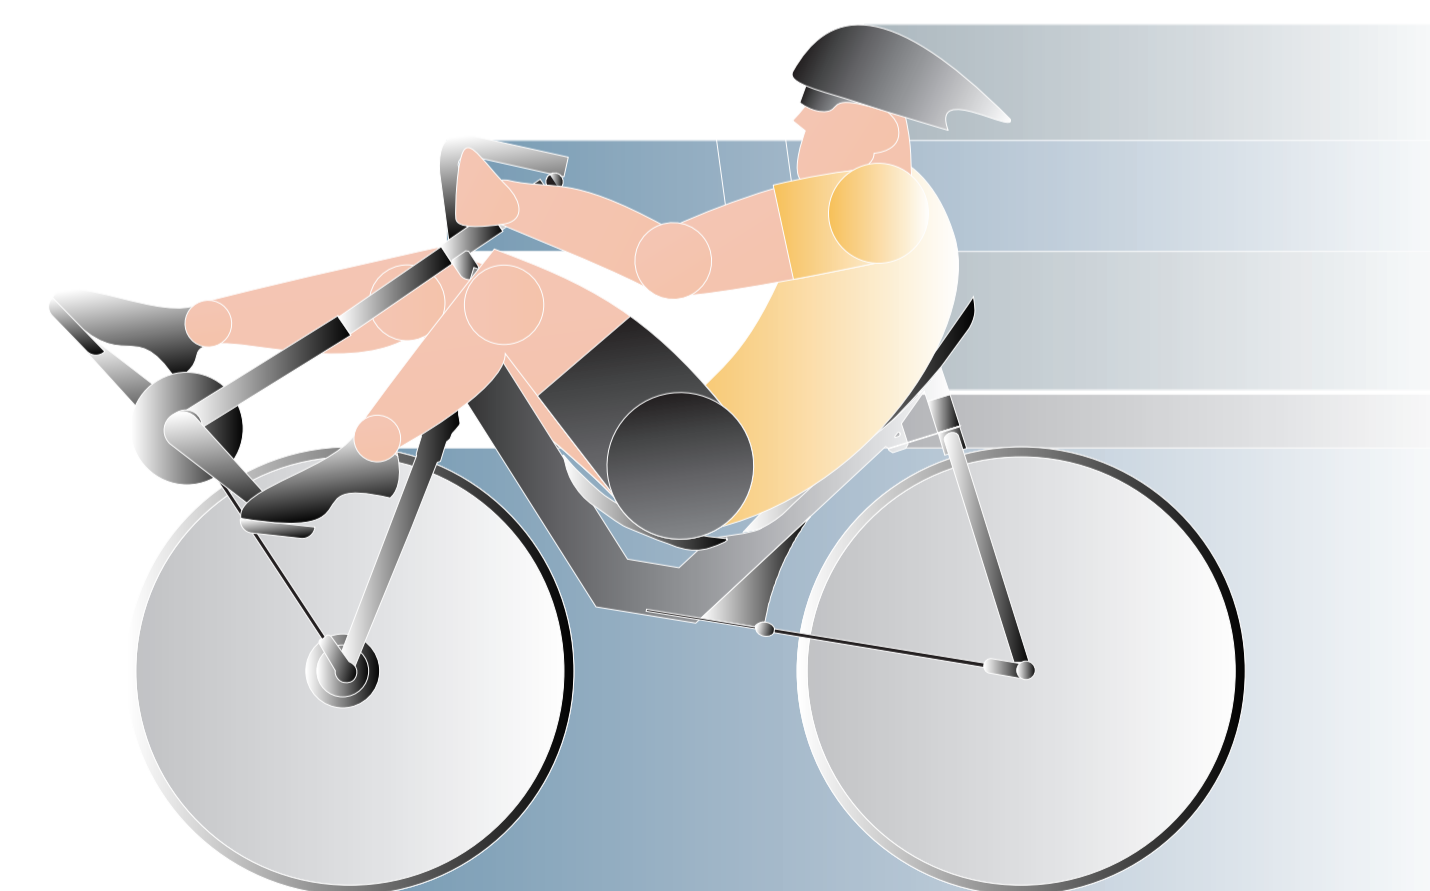

3. ADOPT SYSTEMS
 Ensure 100% compatibility with mainstream quality road components & wheels, like Shimano, Campy and Sram.

4. SPEED
 Manage airflow and power transfer to create the fastest road-bike-compatible unfaired bike on the planet.

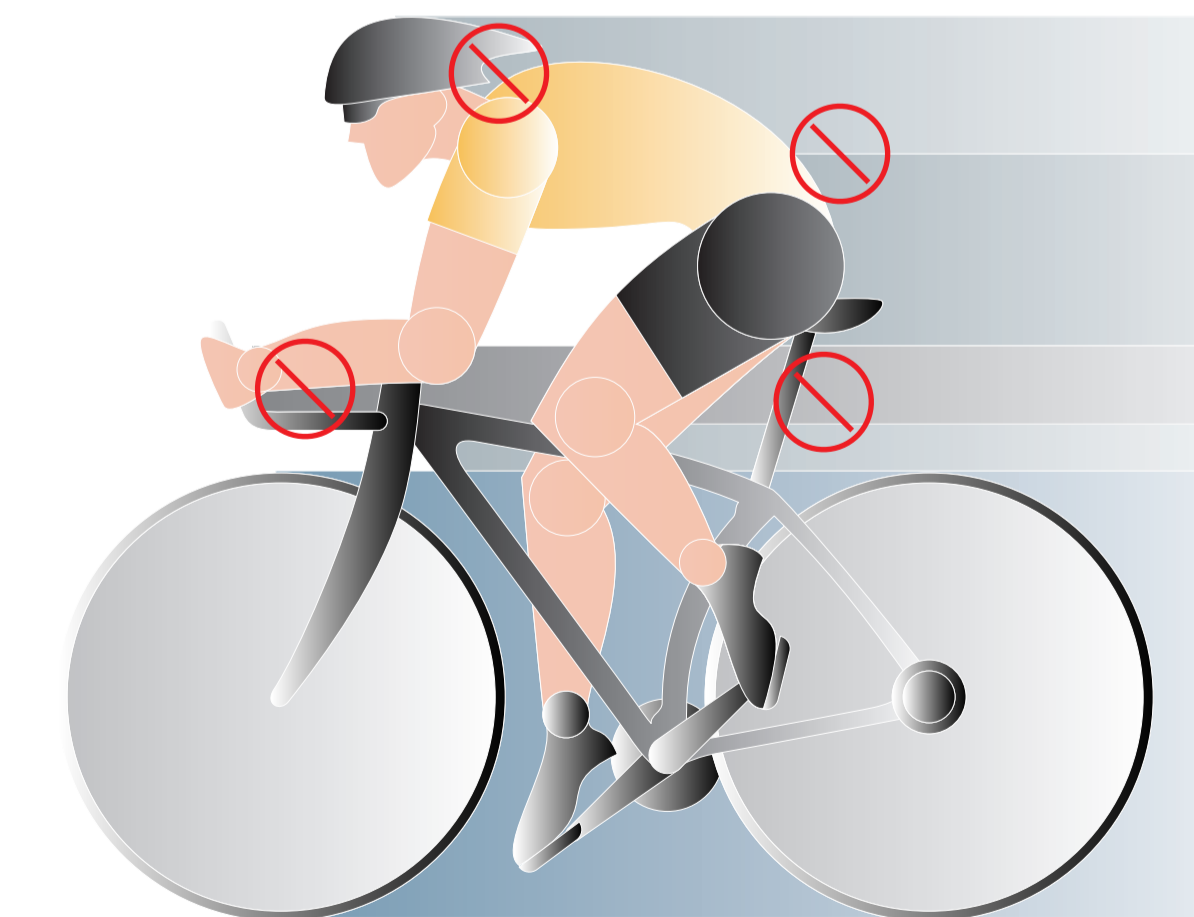

"Thanks to Cruzbike whose wonderful bikes provided the inspiration and tool for this 46 year old housewife to do something she could never otherwise have done."

-Maria Parker, 10 Oct. 2009, North Carolina

CRUZBIKE's patented frame solution straightens out the ergonomic issues to let your body work as it was meant to.

UCI Rules demand you torture yourself, but if you are cycling for fitness and thrills, why should you?
